

Circular No.4 -22/23

23 June 2022

Dear family,

The use of technology in education is getting more advanced day by day as our little ones are more exposed to the digital world. The Oxford school would like to keep our students updated with the latest technology and explore more tools and techniques, that should make them competent enough to face the present world.

Hence, we would like to introduce our students to the latest updates in the **Educore**, the Learning Management System of the school on **Saturday, 25 June 2022** for the students of FS 1 to Grade 5 using the **Educore web**. (Time will be informed by the Grade Incharge)

Further, the school has already started **Mangahigh**, a new Gamified Mathamatic App for grades 1 to 8, which turns the Math problems into fun. In addition, we are launching the **Learning A-Z**, from FS 2 to Grade 5, which is another App to make Reading and Writing more fun.

Our **STEM** classes are providing students with integrated learning of Science, Technology, Engineering, and Maths, which has already been introduced to the students of grades 1 to 10.

And very soon, we will convert our school into a **Design Thinking** School soon.

We expect your whole-hearted support.

Principal
