

Dear Family,

In today's fast-changing and complex world, choosing the right career has become more challenging than ever before. To support our students in discovering their true potential and to guide them towards a future that matches their strengths, interests, and aspirations, our school is organizing an important **series of Career Guidance Events**.

This programme is designed as a **step-by-step journey** for every student of grades 9 to 12

1. **Career Awareness Program** – Understanding the importance of career awareness.
2. **Aptitude Test** – A scientific test conducted at school to assess each child's unique strengths, interests, and abilities.
3. **Individual Counselling** – One-to-one sessions with expert career counsellors to interpret results and discuss suitable career pathways.
4. **Career Profile Workshop** – After identifying their aptitude, the career experts in different fields will guide our students to build their personal career profiles based on their aptitude and interests.
5. **Career Research**- Under the guidance of experts, our students will research on their own future careers, scope, possibilities of national and international scholarships/ fellowships etc.
6. **Final Presentation** – Selected students will showcase their career exploration journey in a mega career event, where the parents and students of other schools are invited

Through this initiative, we aim to make our students self-sufficient to discover what they are good at, and even reach for opportunities like international scholarships and fellowships.

In order to cater all the above-mentioned programs for our students, we have decided to collect **Rs. 1000 from each student. Please pay the amount before 4<sup>th</sup> October 2025.**

With your steady support, we can help them find their way in this complex world and chase opportunities that match their true potential.

**Our children should not just choose a career, but build a life they are proud of.**

Principal
